When the overseas enterprise exports feed or feed additives to China for the first time, it must apply for the **import registration certificate** to MARA and must also be granted **product registration approval**. The certificate remains valid for 5 years and renewal should be applied 6 months prior to expiration.

PREVENTIVE CONTROLS FOR ANIMAL FOOD RULE UNDER FSMA OF USA

Facilities must follow Current Good Manufacturing Practices (cGMPs) for animal food production

Facilities must establish and implement a food safety system that includes an analysis of hazards and risk-based preventive controls

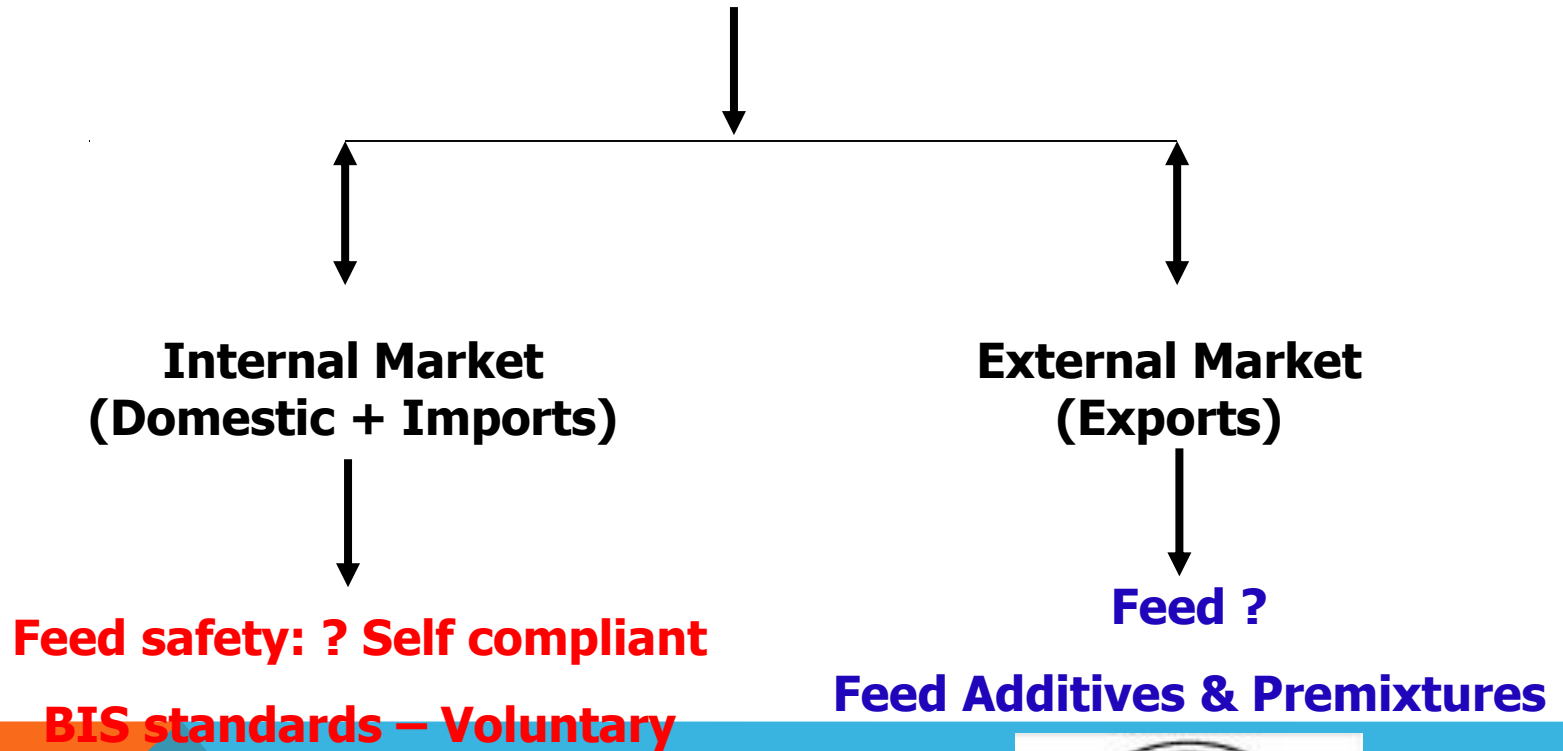

Facilities will need a supply-chain program to address hazards in raw materials and other ingredients

Feed mills that are part of farms (vertically integrated operations) are not covered by the Preventive Controls for Animal Food rule
